ABOUT ME

Full-stack developer with 3–5 years of experience building and maintaining web and mobile applications across PHP/MySQL backends and Flutter mobile apps. Skilled in designing end-to-end systems — from ERP platforms and inventory management to e-commerce and site-visit tracking apps — deployed on AWS S3 and VPS infrastructure. Proven track record delivering and maintaining production systems for multiple clients across engineering, retail, and veterinary sectors, with a strong focus on reliability, clean architecture, and long-term client relationships. In 2026, expanded into DevOps and server infrastructure — managing domains, DNS, and deploying applications across VPS and shared hosting environments.

JOB EXPERIENCE

FREELANCE FULL-STACK & MOBILE DEVELOPER **2022 - Present**

Self-Employed / Doha, Qatar

Independent developer delivering full-stack web and mobile solutions for a range of clients across e-commerce, retail, engineering, and agriculture sectors. Built systems end-to-end — from database design to deployment — using PHP/MySQL, Flutter, and AWS S3/VPS infrastructure. Delivered projects including a resort booking app (2022), a farm/nursery e-commerce app and website (2023), an e-commerce site for a retail client (2023), a full ERP system for Golden Eagle Stores covering invoicing, accounting, vouchers, and reporting (2024), a website for a carpentry business (2024), a Flutter site-visit app and ERP system for QCEC engineering consultancy (2025), and an ERP system, mobile app, and website for Delta Lifts elevator company (2026).
